# Cisco Jabber w/ Headset

Cisco Jabber software runs on any PC, Mac, iOS, or Android device. The software allows phone calls to be made from any device, along with video calls from most devices equipped with a camera. The software also features instant messaging and visual voicemail capabilities.

# 7841 Phone

The Cisco 7841 is an entry-level phone supporting up to four lines. The phone supports wideband audio and features an integrated headset port for hands-free communications. There is also a full-duplex speakerphone for added flexibility. This phone is geared towards a light to moderate voice user.

# 7861 Phone

The Cisco 7861 phone features 16 lines and is meant for a user with more demanding communications needs. The phone supports wide-band audio and features an integrated headset port for hands-free communications. There is also a full-duplex speakerphone for added flexibility. The phone has seven customizable ring tones for easier notifications.

# 8945 Phone

The Cisco 8945 is a mid-level phone supporting up to four lines. The phone features HD voice quality and features an integrated headset port for hands-free communications. There is also a full-duplex speakerphone and VGA quality camera for video-conferencing. The phone has customizable ringtones and Bluetooth support for untethered connectivity. This phone is geared towards a moderate to heavy voice users.

# 9971 Phone

The Cisco 9971 is an executive level phone supporting up to six lines without an expansion module. The phone features HD voice quality and features an integrated headset port for hands-free communications. There is also a full-duplex speakerphone and VGA quality camera for video-conferencing. The phone has customizable ringtones and Bluetooth support for untethered connectivity. It can also be expanded to support up to 108 lines or speed dials, using 9971 Expansion Modules. This phone is geared towards a moderate to heavy voice users with a possible need for video and multiple lines.

# 9971 Exp. Module

The Cisco 9971 expansion module provides 36 additional buttons for speed dials and busy lamps on 9971 phones only. Up to three expansion modules can be connected to a single phone for up to 108 buttons. This expansion module provides the capability to monitor phone lines for all but the largest departments.

# 8831 Conference Phone

The Cisco 8831 is a full-featured, hands-free conference phone with wide-band audio support. It is designed for use on desktops, conference rooms, and in executive offices. Additional wired or wireless microphones are available for purchase.

# 8831 Wireless Microphone

The 8831 wireless microphones provide additional flexibility for meeting rooms equipped with the 8831 conference phone. They work up to 300 feet from the base station using DECT wireless frequencies.

# Jabra Voice 250

The Jabra Voice 250 is a corded headset for Windows and Mac Jabber clients. This headset is ideal for clients who traditionally work from a desk for the majority of the day and prefer a behind the ear headset.

# Jabra Voice 550

The Jabra Voice 550 is a corded headset for Windows and Mac Jabber clients. This headset is ideal for clients who traditionally work from a desk for the majority of the day and prefer a typical headset. A stereo version is available for an additional \$10.

# Jabra Voice 750

The Jabra 750 is a corded headset for Windows and Mac Jabber clients. This headset features a lightweight design for all day comfort. It also comes with a travel pouch for employees who would like to take the headset with them on the road.

# Jabra SPEAK 510

The Jabra Speak USB speakerphone turns any PC into a conference phone for one-to-one or small-group conference calls. The speakerphone also has a headset port for private calls.

# Jabra Motion UC

The Jabra Motion UC with Travel and Charge Kit is perfect for employees constantly on the move. The headset peers with a mobile device or laptop using Bluetooth. The travel case doubles as a charger that attaches to a laptop via USB. It features seven hours of talk time on a single charge.

# Jabra Pro 930

The Jabra Pro 930 is a wireless headset meant for workers who need to move around the office but stay connected. The Pro 930 can be worn over the head or over the ear, with the two included styles. It features eight hours of talk time on a single charge.

# Jabra Pro 9450

The Jabra Pro 9450 is a wireless headset that can be simultaneously connected to a desk phone and a computer. It also can be worn in three different styles, over the head, behind the head, and over the ear. It has up to 10 hours of talk time on a single charge and can work up to 450 feet away from the base.

# Logitech C920-c Webcam

This is a USB attached wide-angle HD webcam. It is the recommended webcam for laptops or desktops without a built-in camera. It features a sliding privacy shutter and dual stereo microphones for use when a headset isn't available
